

Description: Research Fellowships in the Musculoskeletal Radiology Section at Johns Hopkins are offered to scientists, physicians or medical trainees to study the applications of musculoskeletal imaging. Typically, these fellowships are for a period of 6 months - 2 years. The positions require research in a mutually beneficial subject area. The experience can include work in the laboratory as well as participation in clinical studies. The fellow is a member of a multi-disciplinary group including radiologists, rheumatologists, orthopedic surgeons, physiatrists, physicists and imaging specialists. The position is designed to provide a thorough grounding in the conduct of scientific investigations and a broad exposure to musculoskeletal imaging. The fellow will work with faculty in the clinical Musculoskeletal Radiology section and participate on scientific papers and/or scientific exhibits, papers, and posters for presentations at meetings.

Educational Opportunities: Although the primary aim of this program is to provide an opportunity for research, experience in clinical imaging is available. Research fellows are welcome to observe readouts with the house officers. Other educational forums include section specific multidisciplinary working conferences, departmental teaching conferences, journal club, grand rounds and institutional wide lectures.

Eligibility: The positions are self-funded and applicants need to demonstrate the necessary means of support. For 2011, the minimum support is about \$38,496 (US). For internationals, appropriate Visa status is required (J1). Visa documents are prepared by the JHU Office of International Services and the Department of Radiology. Johns Hopkins will supply a workspace, access to computers, information systems, and medical insurance for fellow and dependents.

Application Process: Candidates should submit a curriculum vitae (CV), three letters of reference, and a preliminary statement describing their area of interest, length of time desired and anticipated start date to the program coordinator:

Mary G. Cokley, Administrative Supervisor
Musculoskeletal Radiology Section
601 N. Caroline Street, JHOC 5168
Baltimore, MD 21287
Telephone: 443-287-6032
Fax: 443-287-6403
